Dolomitic Limestone 4013

Dolomitic Limestone 4013 is made from bright, high purity natural dolomite (calcium-magnesium carbonate). Applications include caulking compounds, putties, building products, floor tile, rubber, plastic, adhesives, ceramics, cement and sealants.

Typical Properties:

Top Size	31.0	d95
Average particle size	10.1	d50
Dry brightness	90.7	Hunter Rd Value
Dry color	1.1	b value
Bulk density	62	lbs / ft^3
	1.0	gr / ml
Tapped density	102	lbs / ft^3
	1.64	gr / ml
Surface area	0.8	m^3 / g
Oil absorption	10	g / 100g

Chemical Composition:

$CaCO_3$	55.0%
$MgCO_3$	43.0%
Fe_2O_3	0.3%
H_2O	0.1%

Packaging: Bulk, supersacks and 50 lb. bags

Origin: U.S.A.
